WWW.ETERNITYSOLUTIONS.CO.ZA

Skills development built for the clothing production sector.

Eternity Solutions Training is a South African skills development and compliance partner to the clothing, textile, footwear and leather industry. We design and manage accredited learnerships, short courses and internship pathways that place work-ready people onto factory floors.

Our work is delivered end to end: recruitment, SETA funding applications, accreditation support, learner management, assessment readiness and placement — managed as one project with one point of accountability.

Beyond training, we operate as a managed service for factory owners. Our Manufacturing Excellence & Compliance Management Programme brings compliance, workforce development, operational discipline and commercial readiness into a single integrated methodology.

We also manufacture custom corporate, hospitality, industrial, school and promotional apparel — keeping our own hands in production so our training stays honest to the factory floor.

Project management

TRACK RECORD TO DATE

Accredited learnerships and short courses.

Nationally recognised qualifications delivered with employer partners, so learners leave with a credential and a place to use it.

National Certificate: Sewing Machine Operator

NQF 2 • 12 MONTHS

Industrial machine operation, quality standards, production line discipline and workplace readiness. Delivered with host employers in KwaZulu-Natal.

Pattern Making Assistant

NQF 3 • 12 MONTHS

Pattern interpretation, grading support, marker making and technical accuracy for production-ready garment development.

Short courses

4 – 12 WEEKS

Basic sewing, fashion fundamentals, quality control and production supervision — designed for rapid upskilling of existing staff.

Internship programmes

PLACEMENT

Structured workplace internships with industry partners, including Amanda Laird Cherry (Pty) Ltd in Greyville, Durban.

Compliance, capability and commercial readiness.

The Manufacturing Excellence & Compliance Management Programme (MECM) is a managed service for small and medium factories.

Compliance management

PILLAR 01

Statutory, bargaining council, health and safety and SETA compliance kept audit-ready and continuously maintained.

Workforce development

PILLAR 02

Skills planning, learnership design, WSP/ATR submissions and funded training pipelines matched to production needs.

Operational discipline

PILLAR 03

Line balancing, quality systems, productivity measurement and supervisory capability built into daily routine.

Commercial readiness

PILLAR 04

Costing discipline, retail and tender readiness, and the documentation buyers expect from a credible supplier.

Custom apparel manufacturing

PRODUCTION

Corporate, hospitality, industrial, school and promotional apparel — embroidery, screen printing, heat transfer and woven labelling.

Let's build the workforce your factory needs.

Talk to us about learnerships, SETA funding, compliance management or custom apparel manufacturing.
